

Mechanical Engineering Code of Practices

Comments sheet for the draft Mechanical Engineering Code of Practice

1 Name	2 Comment No	3 Clause, sub-clause or Annex	4 Proposed Change	5 Justification for change	6 Working Group response
Comment	1	Policy Statement	This Code is a statement of good practice for the performance of mechanical engineering work by Registered Persons .		The Working Group note proposed change and accept it. Section 1 has been updated to reflect proposed changes
Comment	2	Purpose and scope of document	This Code also applies when a mechanical engineering practitioner performs mechanical engineering work in the specified categories, such as those related to fire protection systems, lifting machinery and medical equipment. (Note that there is a legal requirement in the OHSAct that for work in categories specified, the person must also be registered with the Chief Inspector).	OHSAct requirements	The Working Group note the comments. However, proposed change is addressed in section 7.2 of the Code .
Comment	3	5.3 Mechanical Certificated Practitioners(GCC Engineers)	Any mechanical engineering practitioner wishes to operate as a certified practitioner shall be in the possession of Government Certificate of Competency as	There is a Certificate of Competency as a Mechanical Engineer and a Certificate of Competency as an Electrical Engineer.	The Working Group note the proposed change or insertion. Section 5.5: Professional Certificated Engineer was reviewed to accommodate proposed changes and
